

KISSING CAMELS FAMILY DENTISTRY COLORADO SPRINGS

TOOTH EXTRACTION TIPS

Bleeding and oozing

- o Completely normal for the first 24 48 hours after the procedure
- Fold gauze in half twice and place with pressure for 30 45
 minutes on surgical site

Avoid theses three things that could disrupt the healing process or cause dry sockets

Spitting, sucking through a straw, and smoking

Oral Hygiene

- Brush your teeth normally
- Avoid surgical area for 48 hours
- Don't spit forcefully, instead let toothpaste fall from your mouth into the sink

TOOTH EXTRACTION TIPS

Discomfort and Swelling

- Completely normal and expected
- Take a cold compress and hold it to face for 20 minutes three time a day

Diet

- Consume soft foods such as yogurt, protein shakes, mashed potatoes, applesauce, etc.
- Avoid hard foods that could get caught in your socket

Stitches

 Stitches will be removed 7 - 10 days after the procedure usually at a mandatory follow up appointment to evaluate the healing process
